## Software Development Part Science, Part Art

Your Technology  
Information Partner

**COMNET International Company** is a global provider of Information Technology solutions that specializes in custom software development and Internet applications. Our technologists develop software products at our Lisle, Illinois facility and at our Chennai, India subsidiary, globalizing the development process and reducing finished product costs. Working closely with your staff, we use state-of-the-art software tools to produce telecommunications, e-business, and Information Technology solutions tailored to your precise requirements.

### "What is Outsourced Development?"

Outsourcing happens when a company contracts a software design and development job to an external organization in order to free up the company's resources for other critical projects or to utilize the outsourcing company's engineers to more quickly and more economically complete a development job.

### "Why Outsource?"

- Provide a better allocation of your company's internal resources
- Access software development skills that are not available in-House
- Deliver products to market faster
- Realize a reduction in software development expenses
- Focus your company on its primary mission

### "Why Should I Outsource with COMNET?"

- Ability to provide highly specialized IT personnel
- Competent, responsive staff
- Global telecommunications facilities
- Rapid, "follow-the-sun" development cycle
- Industry-standard software development processes
- Real-time project tracking
- Prototyping and proof-of-concept capability

**Help your**  
Software take off

**COMNET's**  
Expertise

COMNET continues to grow as the demand for quality information technology services expands. Our software development environment is an extension of our customer's own development facility. By reviewing your business requirements, we seek to create and implement the best solutions using the most advanced technology to meet your needs.

Our India based facility was launched in 1996 and includes over 175 talented and dedicated programmers from India's large network of colleges and universities. Continuing education is highly valued as a means of staying current in this ever-changing world of Information Technology and is available to our employees in our focused stride to attain higher quality standards. With both technology and skill base upgrades, our programmers will complement your existing staff to assist in every aspect of your IT needs.

#### **Alliances**

Our relationships with some of the most respected and well known companies in the IT industry, including: HP, Informix, BEA Systems, help to provide "state-of-art" solutions to our customers.

We know that no one company can be all things to all people, so we've carefully chosen where to develop our expertise:

#### **Telecommunications**

<b>Centrex and PBX services</b>	
<b>Intelligent Network</b>	<b>ETSI INAP</b>
<b>GSM</b>	<b>X.25</b>
<b>GSM HLR</b>	<b>SS7</b>

#### **Development Tools**

<b>C</b>	<b>C++</b>
<b>Visual Basic</b>	<b>JAM/JPL</b>
<b>Windows</b>	<b>Oracle</b>
<b>Informix</b>	<b>Tuxedo</b>

#### **Internet/Intranet**

<b>HTML</b>	<b>Javascript</b>
<b>Java</b>	<b>CGI</b>
<b>Jscript</b>	<b>VBScript</b>
<b>Perl</b>	<b>ActiveX</b>
<b>Tcl/Tk</b>	<b>XML</b>

# COMNET's IT Services Are the answer

## QUALITY is the key

COMNET is focused on providing reliable customized software solutions and services to our customers. What makes outsourcing to COMNET so attractive is the high quality of software developed in Lisle, Illinois in conjunction with our subsidiary located in India. And because software development solutions can be offered at lower costs, a bigger investment can be made in quality assurance, research and development, testing, training and documentation.

**COMNET is also committed to quality standards during the software development process by applying the following**

- Continuous planning and control methodologies
- Rigorous quality management procedures
- A consciousness of quality throughout the organization

COMNET's IT specialists will deliver high-quality custom software development to turn your problem into an opportunity.

**COMNET International Company delivers cutting-edge solutions with superior value. We provide customers with end-to-end services ranging from:**

- system analysis and design
- hardware and software architecture
- application development
- data architecture, conversion, and migration
- network configuration and administration
- structured testing
- documentation and training
- technical support

## Using Technology To Your Advantage

**COMNET's** software development processes take the ambiguity out of complex product development. Fast deliveries are possible through our rapid prototyping technique.

If you have a mature product that requires current engineering and maintenance, COMNET can absorb your work so that your resources can concentrate on more critical projects.

How We Deliver

- Following initial meetings with a customer, COMNET scopes a project and estimates its cost and time-to-completion.
- To give customers an exact understanding of what they will receive, COMNET's analysts develop a specification of the project based on the customer's requirements or ideas.
- COMNET's development team uses incremental prototyping to build a core package that modularly grows into a finished product. This approach allows the customer to easily request product changes at any time during the development phase.
- Stress testing ensures that the complete product performs under extreme conditions in a laboratory environment and at the customer premises.

Our overall objective is to be a global leader of quality software by adhering to the highest of quality practices, resulting in optimal project execution, performance and cost.
